

Save Apprx.
On projects using fiber
and voidcap **25%**

REFLEX[®] TEAR TAB EXPANSION JOINT FILLER

Save time and frustration from void cap by using Reflex Tear tab. Our pre-slit tab with embedded removal cord makes void creation a breeze! Just install as and when the concrete is set, pull the patented, co-extruded "pull cord" and the strip easily tears away creating a clean, 1/2" void. No more dealing with the frustration of fitting void cap onto uneven fiber edges and no more fighting with void cap breaking throughout the removal process!

INTERNAL CORD

Provides structural integrity to the tear strip and ensures a clean separation.

One and Done!

With Reflex Tear Tab you get two products in one!

Less Sealant

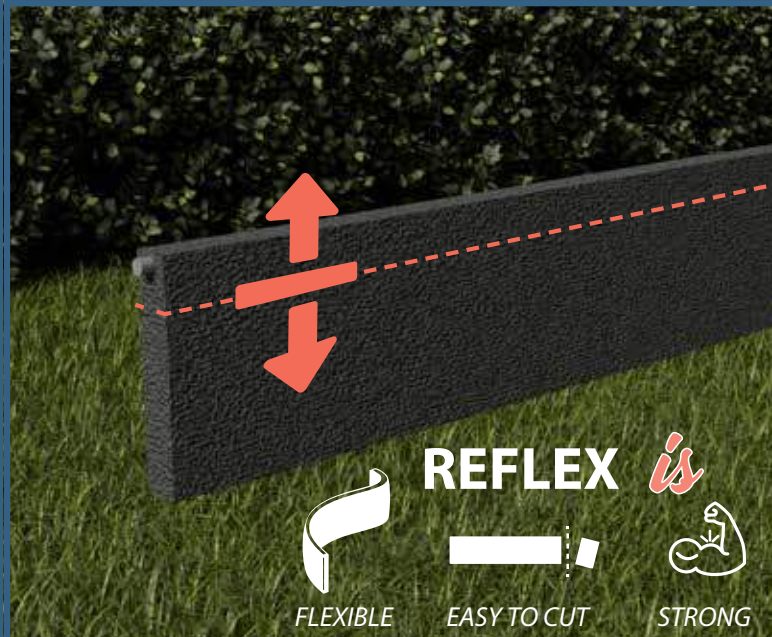

With an even, thinner void you will use less sealant.

Flexible

Form curves with no worries of breakage.

Set and Forget!

Reflex wont heave or deteriorate like fiber. No need to re-do the job later.

THE J D RUSSELL COMPANY

MATCHES WITH MULTIPLE POPULAR CONCRETE COLORS

MULTI-PURPOSE, MULTI-COLORED, RUBBER EXPANSION-CONTRACTION JOINT FILLER

REFLEX® IS BREAKING NEW GROUND

in the concrete industry by providing, for the first time, a colored edge that is ultraviolet stable on one edge with the opposing edge formed of natural black rubber color. Colored edge REFLEX is also made up of components identical to core REFLEX with the addition of a proprietary colorant used in forming a co-extruded covering along one of the opposing edges and extending down 3/4" down each side. The end user will have 5 color options to choose from: CONCRETE COLOR, LIGHT GRAY, TERRA COTTA, TAN, and RED BRICK. Optionally, the end user may elect to show the opposing black edge simply by turning the piece over.

Finishes

-  Terra Cotta
-  Tan
-  Red Brick
-  Light Gray
-  Concrete Color
